DETAILED ACTION

Claim Objections

1. Claims 9 and 10 are improperly depended upon claim 4. The dependency should be to claim 3.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims merely sets forth physical characteristics desired in article and not setting forth specific compositions which would meet such characteristics, are invalid as vague, indefinite, and functional since they cover any conceivable combination of ingredients either presently existing or which might be discovered in the future. Ex parte Slob (PO BdApp) 157 USPQ 172.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1755

The surfactant would be polyacrylates, tetrapotassium pyrophosphate or a combination (col. 7, lines 12-27) and silica and calcium carbonate have an average diameter size of about 5-50 nm (abstract, lines 5-7; col. 3, lines 36-39; col. 5, lines 37-38). Bolt discloses the claimed methods (col. 5, lines 60-col. 8 line 44; Examples 1, 17) of making the pigment and industrial applications (col. 8, lines 45-49).
